PROFESSIONAL EXPERIENCE

CI&T, São Paulo, SP (Remote) — *Software Developer*

From August 2021 to present time

- Developed Websites, small plugins and APIs for local customers. Built and maintained an IoT product in a health tech startup developed in ReactJS/TypeScript and NodeJS/MySQL.
- Automated Environment Setup decreasing the original 2-day setup for less than 8 minutes;
- Created and implemented management metrics and KPIs raising the team's performance in 182,9% within 90 days;
- Coached and mentored 7 junior employees (directly) and over 40 indirectly, developing their soft and hard skills and preparing them for their next level in career.

Perithus Technologies, São Paulo, SP (Remote) — *Full Stack Developer*

From Jan 2019 to Jul 2021

- Developed Websites, small plugins and APIs for local customers. Built and maintained an IoT product in a health tech startup developed in ReactJS/TypeScript and NodeJS/MySQL.
- Coordinated Development projects with a team of 3-5 developers. Raised the NPS score from 55% to 86%

DELL EMC, São Paulo, SP — *Delivery Specialist*

From Jun 2018 to Jan 2019

- Improved deployments of Storage Infrastructure assuring high availability and scalability of services in a Banking company. Implemented a monitoring process that reduced in 10% incidents occasioned by changes in the environment.
