Summary

I am an experienced professional, working in the IT area since 2006. I am very committed in all areas of my life, and am always setting up and achieving new goals both professionally and personally. I work hard and I strive to be the best in everything I do. I have excellent communication skills in English, Spanish and Portuguese languages and work well in an international environment. I work without supervision, am dependable and honest and am respected by my peers.

Experience

Software Developer

CI&T

Aug 2021 - Present (7 months +)

- Designed and implemented a CI/CD Pipeline from scratch. This strategy with the tools allowed the company to provide training for 30+ developer interns at the same time with minimum overhead for the technical staff;
- Automated Environment Setup decreasing the original 2-day setup for less than 8 minutes;
- Created and implemented management metrics and KPIs raising the team's performance in 182,9% within 90 days;
- Coached and mentored 7 junior employees (directly) and over 40 indirectly, developing their soft and hard skills and preparing them for their next level in career.

Full Stack Developer

Feb 2019 - Aug 2021 (2 years 7 months)

- Developed WebApps, PWA's, Websites, small plugins and APIs for local customers. Built and maintained an IoT product in a health tech startup developed in ReactJS/TypeScript and NodeJS/MySQL.
- Coordinated Development projects with a team of 3-5 developers. Raised the NPS score from 55% to 86%

Senior Delivery Specialist

Dell EMC

Jun 2018 - Feb 2020 (1 year 9 months)

- FrontEnd release planning to perform SRDF connections for migration;
- Planning to define the number of Remote Adapters to perform the migration;
